

SYED KASHIF ALI

DevOps Engineer | Cloud Infrastructure

Hyderabad, India | +91 8265061177 | kashifsayyad09@gmail.com | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Motivated fresher and DevOps Engineer with a strong foundation in Cloud Infrastructure and hands-on project experience in CI/CD pipeline design, containerization, Kubernetes orchestration, configuration management, and AWS deployments. Proficient in Jenkins, GitHub Actions, Kubernetes, Docker, Terraform, Ansible, and Argo CD, with practical exposure to AI/LLM integration via Amazon Bedrock. Eager to contribute to a DevOps or Cloud Engineering team and deliver scalable, reliable infrastructure solutions.

TECHNICAL SKILLS

Cloud Platforms	AWS (EC2, S3, IAM, VPC, EBS, RDS, EKS, ECR), Oracle Cloud Infrastructure, GCP, Azure
DevOps & Orchestration	Jenkins, GitHub Actions, Docker, Kubernetes, Argo CD, Helm, Terraform, Ansible
Monitoring	Prometheus, Grafana, Alertmanager, PagerDuty, Datadog, Dynatrace, Node Exporter, cAdvisor
Languages & Scripting	Bash, YAML, SQL, Python, Java
Version Control	Git, GitHub, GitLab, GitHub Actions
Tools	Jira, Postman, REST APIs, Ansible Vault, SonarQube, CodeAnt AI
Concepts	CI/CD, GitOps, IaC, RBAC, OIDC (OpenID Connect), Microservices, Cloud Security, HPA, Ingress

EXPERIENCE

Cloud Engineer — Future Applications Technologies (Internship) Nov 2025 – March 2026 · Beed, Maharashtra, India · Hybrid

- Automated AWS infrastructure provisioning using Terraform, including custom VPCs and EC2 instances.
- Developed user data scripts to automate application deployment and Git repository cloning.
- Implemented EC2 shutdown automation to archive application code and logs to Amazon S3.
- Built a log rotation workflow using AWS Lambda to automatically export and archive CloudWatch logs to Amazon S3.
- Gained strong hands-on experience with AWS services, IaC, and DevOps automation workflows.
- Collaborated in an Agile environment, ensuring smooth DevOps and development integration.

PROJECTS

Containerized Application Deployment on AWS EKS with RDS Jenkins · Terraform · Argo CD · Kubernetes (EKS) · Docker · RDS · Prometheus · Grafana

- Built CI/CD pipelines using Jenkins, Terraform, Argo CD, and Kubernetes (EKS).
- Containerized and deployed Node.js applications using Docker and Kubernetes.
- Implemented monitoring using Prometheus and Grafana for application health and performance.

CI/CD & GitOps Pipeline Jenkins · GitHub Actions · Kubernetes · EKS · ECR · Argo CD · SonarQube · CodeAnt AI · Ansible · Prometheus · Grafana

- Designed end-to-end CI/CD pipelines using Jenkins for automated build, test, and deployment workflows.
- Built parallel CI workflows in GitHub Actions for linting, unit testing, and Docker image build/push on every pull request.
- Integrated SonarQube for static code analysis and CodeAnt AI for automated, AI-driven code review to enforce code quality and security gates before merge.
- Configured GitHub Actions to authenticate to AWS via OIDC (OpenID Connect) federated roles, eliminating long-lived access keys and improving pipeline security.
- Pushed versioned Docker images to Amazon ECR and deployed them to an Amazon EKS cluster as part of the automated release pipeline.
- Integrated GitHub webhooks and GitHub Actions triggers to kick off pipelines on code commits and manage versioned releases.
- Deployed containerized applications on Kubernetes clusters for orchestration and scalability.
- Implemented Argo CD for GitOps-based continuous delivery and automated synchronization.
- Monitored application health using Prometheus and visualized system metrics via Grafana dashboards.

AWS 3-Tier Architecture with Terraform Terraform · EC2 · S3 · IAM · VPC · ALB · Auto Scaling · Docker

- Designed and provisioned a modular 3-tier AWS architecture (web, application, and database tiers) using reusable Terraform modules.
- Built a custom VPC with public subnets for the web tier and private subnets for the application and database tiers across multiple Availability Zones.
- Deployed an Application Load Balancer to distribute traffic to the web tier and Auto Scaling Groups to handle dynamic load.
- Provisioned EC2, S3, and IAM resources using modular, reusable Terraform configurations for scalable, repeatable, and version-controlled deployments.
- Configured IAM roles, policies, and security groups per tier to enforce least-privilege cloud security and restrict cross-tier access.

- Deployed Docker workloads on EC2 instances and validated system performance and connectivity across all three tiers using CLI tools.

Kubernetes Cluster Setup & Management

Kubernetes · EKS · Helm · RBAC · Ingress · HPA

- Provisioned and managed a Kubernetes cluster on Amazon EKS with multiple worker nodes.
- Configured cluster networking and validated cross-node pod communication.
- Deployed microservices using Helm charts with environment-specific value overrides for dev and prod.
- Implemented Role-Based Access Control (RBAC) with namespaced service accounts and least-privilege policies.
- Set up NGINX Ingress controller for external traffic routing and SSL termination.
- Configured Horizontal Pod Autoscaler (HPA) based on CPU and memory metrics for dynamic scaling.
- Managed persistent storage using PersistentVolumes and PersistentVolumeClaims backed by AWS EBS.

Ansible Configuration Management & Automation

Ansible · YAML · Linux · AWS EC2 · Ansible Vault

- Authored modular Ansible playbooks to automate server provisioning, package installation, and OS hardening across multiple EC2 instances.
- Organized infrastructure roles for web server (Nginx), application server, and database server with reusable role structures.
- Used Ansible Vault to securely manage secrets, SSH keys, and environment-specific credentials.
- Implemented dynamic inventory using the AWS EC2 plugin to automatically discover and target cloud instances.
- Automated zero-downtime application deployments using a rolling update strategy with health-check handlers.
- Reduced manual server configuration time by over 80% through fully automated playbook execution.

Linux Administration & Shell Scripting

Linux · Bash · Cron · systemd · SSH

- Performed user and group management, file permission hardening, and SSH key-based authentication setup on Ubuntu servers.
- Wrote Bash scripts for automated log rotation, disk usage alerting, and service health monitoring via cron jobs.
- Managed system services using systemd, created custom service units, and configured auto-restart policies.
- Monitored system performance using top, htop, vmstat, and iostat; resolved CPU and memory bottlenecks.
- Configured firewall rules using UFW/iptables and implemented Fail2ban for brute-force protection.

Monitoring & Alerting Stack

Prometheus · Grafana · Alertmanager · PagerDuty · Node Exporter · Datadog · Dynatrace

- Deployed a full observability stack: Prometheus for metrics collection, Grafana for dashboards, and Alertmanager for alert routing.
- Configured Node Exporter and cAdvisor to collect host-level and container-level metrics from Kubernetes nodes.
- Built custom Grafana dashboards for CPU, memory, pod health, request latency, and error rate visualization.
- Defined Alertmanager routing rules to send critical alerts to Slack and email with severity labels.
- Integrated PagerDuty with Alertmanager for on-call incident escalation and real-time alert notifications.
- Integrated Datadog agent for cloud-native APM, log aggregation, and infrastructure monitoring across AWS services.
- Used Dynatrace for AI-assisted full-stack observability, automatic root-cause analysis, and application performance monitoring.

CERTIFICATIONS

AWS Well-Architected Proficient	Amazon Web Services
Claude in Amazon Bedrock	Amazon Web Services
OCI 2025 Certified Foundations Associate	Oracle
LFS101: Introduction to Linux	The Linux Foundation
AWS Cloud Practitioner Essentials	AWS Skill Builder
AWS Cloud Quest	Amazon Web Services
AI Skills Fest 2026	Microsoft
Dynatrace Essentials	Dynatrace
HackFest 2026	Naresh i Technologies

EDUCATION

Bachelor of Computer Application
Savitribai Phule Pune University, Pune ·

2022 – 2025
CGPA: 8.3 / 10
